

GOVERNMENT AND PUBLIC SAFETY

Trusted AI knowledge systems for public safety and mission driven agencies.

RegainFlow turns fragmented policies, documents, and operational knowledge into secure systems grounded in the source record. Senior engineers work from discovery through production, then leave the agency equipped to run what was built.

CORE CAPABILITIES THE SYSTEM AROUND THE MODEL

01 Information retrieval & knowledge intelligence

Cited answers from policies, SOPs, general orders and training. Answers respect existing permissions, keep a full audit trail, and guard against unsupported responses.

02 Secure platform engineering

Full stack apps, APIs, portals and internal tools with access control aligned to agency roles. Monitored cloud operations, and builds that run in restricted and air gapped environments.

03 Forward deployed engineers & fractional CDAO

Discovery and mission workflow mapping, prototypes built for production, embedded data and AI leadership, and handoff so your team owns and runs what was built.

PAST PERFORMANCE

Enterprise AI knowledge platform

Solution architecture and delivery for a secure, on-premises RAG platform, from ingestion and retrieval through self-hosted inference, .NET integration and security hardening. Quality is tracked with automated evals against a baseline Q&A set and user feedback.

Engineering knowledge RAG

RAG capabilities that turn aerospace engineering documentation into searchable, cited knowledge. Covers structured extraction, hybrid retrieval, reranking and grounded generation, evaluated against curated Q&A sets.

AI search & flight software

Savant & AI Hub. Enterprise search and RAG over 1M+ records, then the Space division's AI Hub for governed agent workflows. Built for classified and air gapped deployment.

Mustang / LM400 space bus. Class B flight software on NASA cFS in C++ and Python, including power diagnostics and automated load shedding.

Signal & cyber operations

Signal. Classified and unclassified communications for a 500-Soldier space and missile defense organization across 50+ mission platforms.

Cyber. Led and trained cyber personnel and supported allied partners in cybersecurity practice and warfare.

WHY REGAINFLOW SENIOR ENGINEERS. ONE ACCOUNTABLE PATH.

Credentialed operators

Active TS/SCI clearance holders with Security+, PenTest+, CEH and CCNA.

Fortune 100 delivery

Enterprise AI shipped inside Lockheed Martin, Pratt & Whitney and government services environments.

Compliance ready

SOC 2 Type II and STIG hardening. Handled CUI, UCNI, ECI and TPPI on JWICS, SIPR and NIPR.

Transferable ownership

Documentation, runbooks and working sessions with agency staff.
